

# Fast, reliable & cost-efficient

All-Flash Solutions built with IBM Spectrum Virtualize™

## Accelerate performance

Use all-flash performance to improve core application response time.

## Expand storage utilization

Increase storage capacity by up to 5 times with outstanding performance- guaranteed<sup>1</sup>.

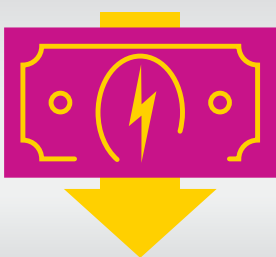

## Enhance data security

Improve security for data without requiring upgrades to existing storage systems with IBM Encryption.

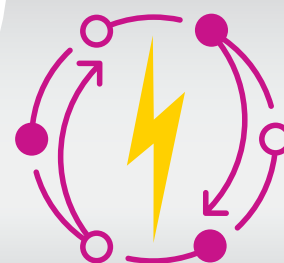

## Optimize data economics

Enhance storage efficiency and save energy, cooling and floor-space requirements.

## Maximize flexibility

Unique heterogeneous data services that increases utilization and efficiency for over 400 different storage arrays.
